Profile

I am open to research, learning and development. I have been developing myself with various courses and trainings in the web field for more than 3 years and applying the knowledge I have gained with different projects. I attach importance to teamwork, planned and programmed progress. I have not had a professional experience yet. My goal is to gain an experience where I can apply the knowledge I have gained and add new knowledge to myself.

Education

Atatürk University - Computer Programming 2021-2023

Atatürk University - Vocational School of Justice 2019-2021

Certificates

Skills

HTML, CSS, BOOTSTRAP, JAVASCRIPT, ANGULAR, C#, .NET, ENTITY FRAMEWORK, SQL, Git, Github, Planning Skills, Communication Skills, Agile 101, Business Management Skills

Project

Acoustic Medical Center

In the Acoustic Medical Center project, I developed a hospital appointment system. I used Angular and ASP.NET Web API to structure the Domain, Data Access, and Business Logic layers with an n-tier architecture. I designed a dynamic and user-friendly interface with Angular, optimizing user interactions. I managed database operations using SQL Server and Entity Framework. This project allowed me to further enhance my software development skills and full-stack experience.
